## **Abstract**

The education is the main component which decides the development of the worldwide national human resources. Studying is important since it helps a person to develop the personal skills and a complete education. It also helps to improve knowledge which is needed for careers and gives opportunity to develop their habits such as time management skills, a good study habits and self-discipline. However, some school and university students have had a failure in their studies since they weren't able to achieve the desired marks. This kind of situation can lead the students to graduate late, loss of confidence and opportunity with finding a desired work. Educational institutes spend significant amount of their annual budget on trying to solve the issue regarding the drop out students increasing rate.

This system built with an aim to make the students life easy more planned to make the student not feel stress about not ready to face the exam this system implemented. It will give well created planner with the grade perdition. This is a solution for the problem student facing.
